

Ruggedized Copper Connectivity

Siemon is well-known for its industry leading high performance connectivity. The same high performance copper and fiber products are available with our patented Ruggedized MAX® & Z-MAX® housings. Ruggedized outlets and modular patch cords provide an IP66/IP67- rated seal, protecting plug and outlet contacts from dust, moisture, vibration, and common cleaning chemicals. These solutions are ideal for protecting valuable connections in laboratory environments, hospitals, food processing plants and other harsh environments.

- 1 Standardized Interface**
The Ruggedized connector has been recognized by the Open DeviceNet Vendor Association (ODVA), TIA-1005A-2020 and IEC 61076-3-106
- 2 Easy Termination**
The Ruggedized MAX outlets utilize a standard 110 tool for quick and easy punch-down termination while Z-MAX outlets feature an innovative record-setting termination method
- 3 Gripping Ribs**
Plug housing and dust caps feature ribs to provide additional gripping for mating and unmating
- 4 Ensures Proper Seal**
Quarter-turn bayonet-style mating ensures proper plug depth into the outlet and an IP66/IP67 rated seal

Compared to all other RJ-45 products on the market today the Z-MAX termination process embraces the principle that simpler is better. By establishing straight forward steps that eliminate potential errors, Siemon has been able to set a new benchmark for the fastest UTP and shielded category 6A outlet termination speed.

Vibration Causes Contact Damage In Typical Outlets

Seen under a microscope after exposure to extreme vibration, contact between a typical modular plug and outlet can pit the contact pins, causing intermittent transmission problems.

Humidity Affects Typical Outlets

Humidity corrodes contact pins inside typical outlets. Repeated exposure can eventually destroy the contact pins, rendering the outlet unusable. The Ruggedized MAX outlets special housing prevents this corrosion.

Meets Harsh Demands of the Environment

Specially designed Ruggedized connectors can withstand humidity, dust and vibration.

RUGGEDIZED G2 Z-MAX® OUTLETS

The Ruggedized G2 Z-MAX Outlets feature Siemon's high performance Z-MAX Outlets with innovative and fastest termination method in the industry. The combination of premium connectivity and Ruggedized housing with quarter-turn bayonet-style mating design provides a high performance solution for harsh environments.

PART NUMBER	DESCRIPTION
XG2-Z5S	Category 5e Shielded Ruggedized G2 Z-MAX outlet, T568A/B
XG2-Z6	Category 6 UTP Ruggedized G2 Z-MAX outlet, T568A/B
XG2-Z6A	Category 6A UTP Ruggedized G2 Z-MAX outlet, T568A/B
XG2-Z6AS	Category 6A Shielded Ruggedized G2 Z-MAX outlet, T568A/B

RUGGEDIZED MAX® OUTLETS

The Ruggedized MAX outlet features a MAX module housed in a protective shell. The outlet's outer housing is made of durable, chemical-resistant, Ruggedized-grade thermoplastic and features Siemon's patented quarter-turn bayonet-style mating design. Guaranteed category 5e and 6 performance to 160 MHz even in the most punishing environments.

X6	Category 6 UTP Ruggedized Outlet, T568A/B

RUGGEDIZED BULKHEAD COUPLER

The Ruggedized Bulkhead Coupler provides back-to-back shielded category 5e outlets in a single Industrial MAX shell to enable protected plug-to-plug connections. This robust connector is fully protected on both sides to provide a true IP 66/67 connection, surpassing typical designs where only one side is protected. The modular design allows panel feed-thru connections without the need for termination. While the Bulkhead Coupler provides sealing on both sides, it is also ideal for use on enclosures with a protected connection on the outside to a device, and standard modular patch cord on the inside to a switch or controller.

PART NUMBER	DESCRIPTION
X5-X5S	Category 5e Shielded, MAX Ruggedized bulkhead coupler (outlet to outlet)

RUGGEDIZED PLUGS

The Ruggedized Plug features a category 5e modular plug contained in Siemon's Ruggedized-grade housing with patented quarter-turn bayonet-style mating design. The plug can be terminated in the field, allowing custom lengths to be assembled quickly on site in the event a cable is cut or damaged. It terminates to twisted-pair cable with 22 – 26 AWG (0.64 – 0.40mm) solid or 7-strand conductors with an insulated conductor diameter of 0.86 – 0.99mm.

Product Information

RUGGEDIZED CATEGORY 6 UTP PATCH CORDS

Siemon's Ruggedized category 6 UTP patch cords are constructed using flame-retardant thermoplastic elastomer (TPE) outer jacket over a polyvinyl chloride (PVC) inner jacket. Combined with a -40 to 75°C (-40 to 167°F) temperature range, high flex construction, oil resistant jacket and UL/cUL CM/CMX outdoor rating, they are ideal for use in providing end-to-end category 6 channel performance in harsh environments.

RUGGEDIZED CATEGORY 6A SHIELDED PATCH CORDS

These cable assemblies provide the final component necessary to construct a category 6A shielded channel solution for harsh environments when used in conjunction with Siemon's category 6A shielded cable and category 6A compatible shielded Ruggedized outlets. TPE jacket assemblies constructed using flame-retardant thermoplastic elastomer (TPE) outer jacket are also available.

RUGGEDIZED DUST CAPS

The Ruggedized dust caps are the ideal way to protect your investment in your Ruggedized cabling system. Outlet dust caps can be used to protect unused outlets or to seal an outlet during wash down periods when the outlet and plug may be disconnected. Plug dust caps protect Ruggedized patch cords from exposure to elements or accidental damage when not mated to an outlet. Dust caps are constructed of ruggedized-grade thermoplastic for superior protection and durability. Additionally, outlet and plug dust caps feature a retention tether, which prevents them from being misplaced when not in use.
